# The Stone & Tile eBook 2022

## Welcome to *Stone World's* and *TILE Magazine's* Buyers Guide ebook

As the go-to sources for information in the stone and tile industries, we continually strive to make it easy for you to connect to suppliers and services that help your business improve and grow. We created this new combined ebook version of the Stone Guide and Tile Gold Book to give you a one-stop source of information to help your business. At the same time, we have streamlined our approach to mesh with today's digital on-the-go reality and "need it now" mentality. While the format may have changed, the reliable content that you expect from *Stone World* and *TILE* continues as we provide the most up-to-date information available.

We have organized this ebook and our online buyers guides with the following sections:

- *Fabricating Tooling & Supplies*
- *Fabricating Equipment*
- *Stone Materials & Products*
- *Stone Supplier*
- *Tile Products & Installation*

In today's challenging times, the landscape of our industries can change fast. This comprehensive resource is here to serve you 24/7. It will save you and your company time and money all while keeping you current with the latest supplier information available. We actively work with each industries' top suppliers to keep their information current so researching and connecting with them is a simple and straightforward process.

Thank you for the hard work that you do. It is our hope that this information that follows will make your job easier and make your buying process more efficient and productive.

And thank you to all our partners who have helped us become "the source" connecting suppliers to end users.

**David A. Madonia**

**PEARL®**

Tooling and accessories, such as vacuum pods, drill bits and blades, are key components in the fabrication process. Digital templating systems offer accuracy and efficiency when measuring for kitchen countertops and bathroom vanities, and many fabricators are offering sinks to their customers for a one-stop shopping experience.

# GranQuartz®

## GranQuartz.com

GranQuartz is a renowned leader and the largest distributor of stone fabrication tools, equipment, and supplies in the United States. Since 1971, GranQuartz has provided an unbeatable selection of high-quality granite and stone fabrication tools and accessories to meet the needs of the modern stone worker. Additionally, GranQuartz offers a wide selection of concrete polishing and floor cutting equipment, as well as a wide selection of tile and glass tooling equipment and monument supplies. For 50 years, GranQuartz has been a trusted and well-established partner that customers can rely on to do whatever it takes to help ensure the success of their business.

As an industry leader, GranQuartz is committed to sourcing, developing, and distributing the most innovative, cost-effective tools from the world's leading and most trusted brands. GranQuartz partners with top manufacturers to maintain an unparalleled sourcing pipeline and is an exclusive provider of Manzelli, Gorilla Grip, Zoller, Nitro One Shot, and ADI. Through research, testing and development, the manufacturing process continues to evolve, providing customers with the best tooling on the market. In addition, GranQuartz has a broad selection of exclusive proprietary brands, including Diarex™ Pro Series™, Diarex™ Assassin™, Diarex™ Legend™, and Recon™.

GranQuartz has shipping and retail locations across the United States and experienced sales and technical

support professionals to serve every individual. They provide technical skills to meet the needs of customers and to resolve their business challenges quickly. The GranQuartz team of knowledgeable associates genuinely cares about finding solutions that will increase the value of fabrication work. Furthermore, GranQuartz operates the largest fleet of mobile sales vehicles in the stone industry, bringing customers the products they need when they need them. GranQuartz takes pride in understanding the importance of excellent service and on-time delivery, realizing that success depends on having quality products to complete jobs on schedule.

Stone Boss Industries was founded in 1991, supplying top quality products at competitive pricing. Since our inception, a special emphasis was made on customer service, before, during and after the sale coupled with our unique truck route sales system.

Stone Boss Industries maintains a very large inventory and carries a complete line of diamond tools and abrasives for your cutting and grinding needs. Setting materials, adhesives and fastening systems are available for even the most demanding tasks. Silicon carbide bonded and coated abrasives for a variety of sanding needs is in stock and available. We distribute stone care systems specifically formulated for the step by step maintenance of all mineral surfaces.

Stone Boss' knowledgeable, hands-on sales staff enables us to provide detailed technical assistance on all facets of stone working. We have innovative products and services geared specifically for you, the stone working professional. We are firm in our commitment to supply the finest products for stone working.

We would like to thank all of our existing customers for their loyalty and support over the years. We would also like to welcome new customers and look forward to a long and prosperous future together. We hope that stone continues to be the first choice as nature's most beautiful and unique building material.

Laser Products Industries (LPI) celebrates more than 25 years of innovative digital measuring solutions for companies in stone and various other industries. Led by its popular LT-2D3D Laser Templator digital templating system, LPI has sold more than 6,000 systems throughout the world that have helped thousands of companies increase their productivity.

The LT-2D3D can help you complete more jobs per day with greater accuracy and efficiency than ever before. Setup only takes a few minutes – no need to clear or remove existing countertops – just point and click! The LT-2D3D is designed to rotate virtually 360° for optimal coverage and accuracy. Our software is designed to be extremely intuitive – CAD experience is NOT required! Simply add in features, such as sinks and backsplashes, with a click of a button. Send photos, estimates and even CNC-ready files directly from the jobsite!

The transition to going digital doesn't have to be a daunting move, from both a learning and financial perspective. The same fundamentals and experience from manual templating still apply with digital, just executed in a different and more efficient way allowing you to complete more jobs per week or even expand your services. This increased revenue and operational cost savings provide a quick return on investment. Coupled with flexible financing options, the investment becomes affordable and less intimidating.

Today, the LT-2D3D continues to be the market leader in digital templating systems with more than 3,000 customers worldwide, including 13 of the last 16 Stone World Fabricators of the Year. LPI takes pride in being an American manufacturer and taking care of its #LPIfamily domestically and internationally. Our company consists of multiple generations of families, military veterans, and team members who have been here for more than a decade. We have aimed to provide quality products and extraordinary customer service for the past 25 years and look to continue this excellence for another 25 years and beyond.

# The Complete Package

- Two licenses of the user-friendly and robust LT software included for work in the field and shop.
- Switch between 17 different languages in the software to accommodate diverse workforces.
- Tablet, tripod, accessories and hardshell roller case included to start templating right away.
- Precise laser measuring hardware with 50+ hour battery life. No need for additional battery packs or power cords.
- Online AND onsite training included with each system.
- Comprehensive warranty program designed to provide coverage from workmanship defects AND accidental damage for 5 years.

Leader in Digital Fabrication Solutions

# ZENESIS™

ZENESIS™ is an advanced technology that delivers dramatic improvement in diamond tool performance through the custom designed diamond patterns specific to each application.

### HYBRID LAYERING PERFORMANCE RUNS DEEP

By combining layering techniques with extraordinary degree of precision, we ensure that our high-quality diamonds will always be evenly exposed throughout the segment to allow faster cutting and efficient debris removal. And we've rigorously exacted our manufacturing processes to ensure a perfect pattern – cut after cut. For our most innovative blade offering, ZENESIS™ takes this process one step further by optimizing the distribution and concentration of diamonds on the segments to deliver raw cutting power where it is needed most. Greater performance is delivered as this strategic placement of diamonds virtually removes all cutting inefficiencies.

### ZENESIS™ PATTERN TECHNOLOGY:

#### FROM THE COMPANY THAT STARTED A REVOLUTION

Simple patterning is not enough. Patterning technology has been around since the 1960's; however, the performance achieved through the even distribution of the diamond grit did not justify the added complexity in manufacturing. Through years of intensive research and development,

our engineers at ZENESIS™ have refined our proprietary patterned diamond technology to achieve maximum cutting performance without sacrificing life or quality of the cut. Our pattern exposes the ideal number of the highest quality diamonds throughout the life of the tool, providing consistent performance from start to finish.

- Speed: Up to 70% faster cutting speed\*
- Life: Up to 70% longer tool life\*

### Conventional Diamond Tools

- Diamonds are randomly distributed.
- Random distribution results in inconsistent tool performance.
- Trade-off results between cutting speed and tool life.

### Simple Arrangement of Diamonds

- Elimination of random distribution provides only marginal improvement in performance consistency.
- Does not justify the increase in manufacturing complexity

### ZENESIS™ Technology: Evolution of a Revolution

- Hybrid layering provides maximum diamond exposure for enhanced performance
- Up to 70% faster cutting speed
- Up to 70% longer life
- Cost-effective mass production

THE MOST ADVANCED DIAMOND BLADE EVER CREATED

**ZENESIS™**

**OBSIDIAN**

Meet the newest ZENESIS™ Technology silent core bridge saw blade, Obsidian. Distinctly designed to cut fast and clean on engineered stone, porcelain, marble, and even the hardest quartzite. This is made possible by using our latest and most innovative ZENESIS™ diamond patterning technology to date. The latest ZENESIS™ diamond pattern increases the number of cutting/contact points by up to 3 times and significantly improves performance. The unique metal bond matrix is engineered to work with virtually all natural and man-made stones. Available in sizes 12" to 20".

When it comes to cutting stone and quartz surfacing, there are many options for fabricators to turn to for their production needs. From CNC stone cutting machines to sawjets and line polishers, manufacturers continually introduce updates in technology to assist in production. Block saws and wire saws are also available for cutting large three-dimensional pieces, and water recycling and air filtration systems help to keep a safe working environment.

# water

treatment solutions™

Water Treatment Solutions designed its first system, exclusively for the Stone Fabricator, in 1996 and 25 years later we continue to lead the industry with the most effective and economical 100% closed loop water recycling system, for our industry. We are the only system that produces, CHEMICAL FREE, crystal clear water safe for all your equipment and less than 25 micron gray water, filtered through our patented GrayTech.

Water Treatment Solutions provides systems for shops that fabricate from 1 to over 100 kitchens a day while providing the industry's best customer service to all! All our systems enable you to turn your sediment into dry manageable cakes, that are easily disposed of and which assist in reducing air born silica.

Be sure to inquire about upgrades or expansion options to existing systems.

## FABRICATING EQUIPMENT

Wilson Industrial Electric, Inc. is known for industrial automation for the stone industry. With a complete line of

- Blade Saws
- Wire Saws
- Cut Off Saws
- Rip Saws
- Polishers
- Conveyor Lines
- Turntables

We are sure to fulfill all your stone needs. Wilson Industrial Electric manufactures all equipment here in the United States. Located in Elberton, Georgia, Wilson Industrial Electric offers a full line of parts for all your industrial needs, with our in-house sheet metal fabrication and machine shop we're sure to supply our customers Quality and Durability. We hold onto these values combined with proven technologies and listening to our customer's needs, to produce one of the most long lasting, reliable, and productive saws in the world today. Thank you for your continued support of our family owned and operated business for the last 39 years.

### CMS NORTH AMERICA

CMS Stone Technology develops avant-garde solutions for the working of marble, natural stones, and composite stones. A reliable technological partner in designing unique solutions, for any need, in the world of building, architecture, interior and exterior decoration, and wherever the use of stone and marble products is required.

### THE BREMBANA KOSMOS JET

#### 5 AXES MONOLITHIC SAW JET MACHINE

A new generation of 5-axes bridge saw entirely managed with Numeric Control. Compact and easy to install, it does not require any kind of base so it can be re-located almost immediately. The machine is fitted with an abrasive waterjet cutting head which, by working in combination with the diamond blade, means natural stone and composite slab cutting can be automated when there are interferent cuts and internal angles. The machine is designed for all laboratories that cut natural stone, composite, and ceramic slabs. The machine's weight, which can be as much as 16,000 lbs, guarantees a perfect rigidity when producing:

- kitchen top
- vanity tops
- flooring
- street furniture
- wall panels (internal and external)
- doorsteps, staircases and window sills

### KEY BUYER BENEFITS

- + No workability problem due to the most extensive working table in its category: 157 in x 93 in
- + Complete protection against rust: the structure is manufactured in hot galvanised steel, while the work tank is in stainless steel
- + Installation dimensions are the smallest in this category: the machine takes up just 393 ft<sup>2</sup>
- + Slab loading operations made easier thanks to the tilting table with an off-the-ground height of just 15 in

A local distribution presence around the globe means we can stay close to our customers, guaranteeing highly specialized technicians who can consistently provide a fast, professional response. As our products evolve to stay ahead of the competition, so does our service staff. Because of this, our customer service and products have become the industry's standard for excellence. CMS provides efficient, reliable, proactive and reactive solutions to your problems. Not only to reduce a machine's downtime, but also because effective, innovative solutions create added value and protect the customer's investment.

Vytek has been designing, building, and selling laser technology for over 30 years. Founded in 1989 by Dirk Burrowes, and headquartered in Fitchburg, Massachusetts, Vytek's roots are grounded in innovation, hard work and reliability. Starting with only a small job shop, Burrowes soon expanded into production to keep up with demand.

In the early 90s, Vytek began its laser development with the M-Series and expanded to include a wide range of CO2 products, and later, fiber lasers with a series of automated OEM solutions. With its complete line of laser-based cutting, welding, and engraving equipment, Vytek sets the industry standard for performance and ROI.

Perhaps it's Vytek's in-house software development or willingness to custom design products to meet client needs, regardless, Vytek continues to be a key player in laser system solutions for a broad spectrum of global industrial markets. Vytek has sold more than 2500 systems in 47+ countries.

978.342.9800 | [www.vytek.com](http://www.vytek.com)

Whether seeking an exotic material for a luxurious residential or upscale hospitality application or an aesthetically pleasing, yet durable, stone for a busy household, there is a seemingly endless supply of stone materials and products available. Among the selections are granite, marble, limestone, slate, bluestone, quartzite, sandstone and flagstone. These stone varieties are being used for both indoor and outdoor design elements. Moreover, pre-fabricated products such as fireplace surrounds and vessel sinks are also available to enhance a design.

[CLICK HERE FOR A COMPLETE LIST OF  
STONE MATERIALS & PRODUCTS](#)

Stone material in all varieties is being extracted from quarries worldwide. There are large stone producer groups who own quarries in multiple countries, while there are also still smaller family owned operations. Regardless the size of the company or quarry, tremendous care and planning is being taken by stone suppliers to produce stone material for its customers, whether big or small.

[CLICK HERE FOR A COMPLETE LIST OF  
STONE SUPPLIERS](#)

From porcelain to ceramic, and even glass mosaics, tile is available in all formats nowadays. Inspired by natural materials such as wood, concrete, cement, stone and terracotta, there are endless design possibilities for these products. Tiles also come in a variety of sizes, from 4- x 12-inch sheets to 6- x 12-foot panels, which are applicable on floors, walls and even ceilings, both indoors and outdoors, in residential and commercial environments. A wide range of adhesives and tile-setting materials, including mortars and grouts, that assist in the application of all types of tiles are also readily available for every professional's needs.

# PEARL®

The New All-In-One PLS™ Pearl Leveling System is a system of interlocking clips and re-usable wedges made to ensure floors will be perfectly level from one tile to the next. This all-in-one lippage control and spacer system levels tiles and creates grout joints, making setting tiles easy and profitable.

Designed to speed up installation time, the PLS™ requires minimal effort to set up. Its multi-polymer plastic provides greater tensile strength while remaining flexible enough to avoid breakage failures during installation. Its easy identifiable color-coded leveling clips create consistent grout sizes of  $\frac{1}{32}$ ",  $\frac{1}{16}$ ",  $\frac{1}{8}$ " and  $\frac{3}{16}$ ".

In addition, removal is easy and very clean. Ridges on the base create break lines under tile, ensuring no plastic parts remain in grout joints.
