# SOLUTIONS

## For Every Aspect of your Fabrication Shop

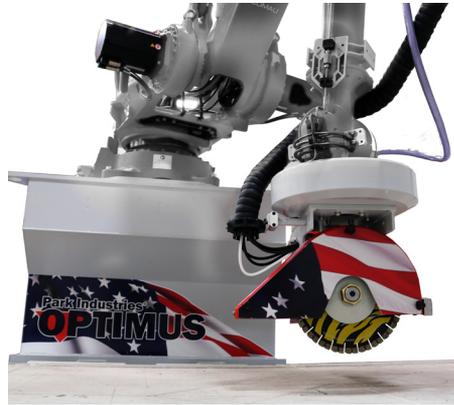

### Improve Productivity, Reliability, & Profitability

Park Industries® is the established leader in the stone processing equipment industry, providing state-of-the-art solutions for customers who have no room for compromise, error, or downtime.

### OPTIMUS™ ROBOTIC SAWJET

The OPTIMUS™ Robotic SawJet is the next generation in Park's line-up of CNC offerings. Combining the value of CNC sawing and waterjet capabilities, the OPTIMUS™ will enhance your sawing efficiency with easy programming and exceptional table reach capability. The small footprint of the OPTIMUS™ will maximize optimal shop layout.

Models: Single and Dual Tank

### VOYAGER™ XP 5-AXIS CNC SAW

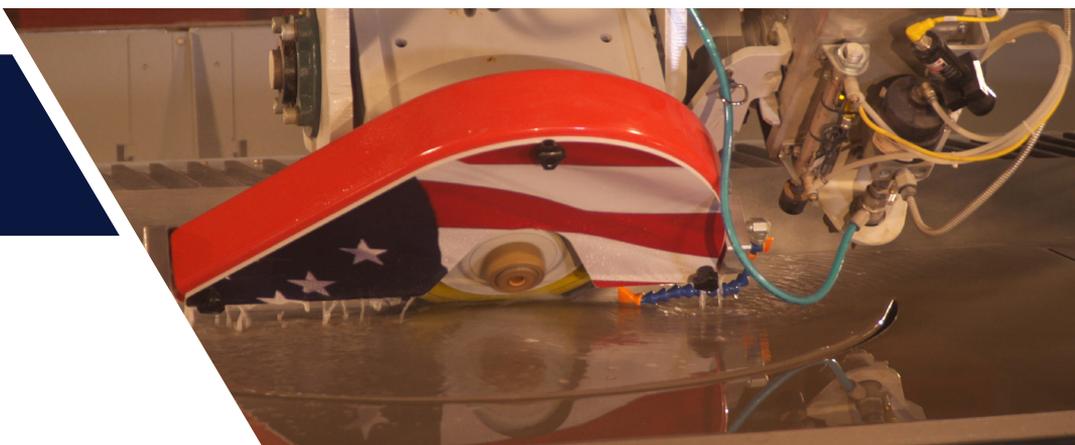

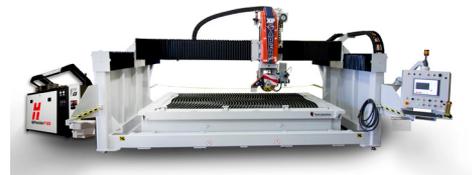

The VOYAGER™ XP 5-Axis CNC Saw is powered by a 27 hp motor, and cuts the hardest slabs such as porcelain, ultra-compact materials, and quartzite with ease. The new TightCut™ feature nests parts closer together, increasing material yield by nearly 10% while reducing the time spent incremental routing.

### SABERjet™ XP CNC SAWJET

Power up with the SABERjet™ XP sawjet, making cutting even the hardest materials (ultra-compact, quartzite, and porcelain) a snap. The XP features exceptional blade and waterjet miter capability including the ability to miter arcs with the waterjet. Also included in this model is the NEW Hypertherm® predictive maintenance pumps (50 hp or 60 hp), industry-leading 27 hp saw arbor motor, and automated ultra-compact programming routines for programming simplicity.

Models: Single and Dual Tank

## TITAN® Fab Center CNC ROUTER

With just TWO employees working an 8 hour shift, you can produce 120 square feet of finished countertop with the TITAN® CNC Fab Center. The TITAN® CNC Fab Center can cut, miter, shape, and polish all on one machine. The power of this machine will allow you to transform your shop to a digital shop. With this system, you may be able to reduce your labor costs by over 50% and your square foot costs by nearly 40%.

## TITAN® 3000 SERIES CNC ROUTER

The TITAN® CNC Router built for speed! Redesigned to dominate high-speed polishing and packed with new operator friendly upgrades, the next generation of TITAN® CNC Router has arrived. The TITAN® is the most popular CNC Router found on the market with over 700 machines installed throughout North America.

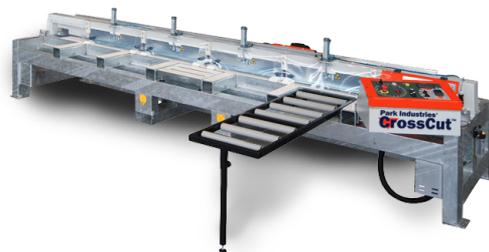

Models: TITAN® 3700 | TITAN® 3800

## CrossCut™ SERIES MITER SAW

Introducing the CrossCut™ Miter Saw series, designed for one thing and one thing only - precise miter cutting. Produce fast, flawless miters of granite, porcelain, quartzite, and more at a rate of 39" per minute. This value-priced machine is a perfect compliment to your high production saw or for shops with plenty of miter work.

Models: CrossCut™ | CrossCut™ Deluxe

## YUKON® II BRIDGE SAW

Increasing your output speed is easy when you use America's most popular saw – the dependable YUKON® II Bridge Saw. The bridge miter capabilities create accurate and clean miter cuts up to 47 degrees. And, the table includes pre-determined stop locations and pneumatic brakes and positioning for ultimate control. Trust your sawing needs to the YUKON® II.

## SIERRA® BRIDGE SAW

The SIERRA® from Park Industries® is designed and built for heavy-duty performance and reliable results. With up to a 16" diamond blade, the SIERRA® can cut stone up to 3-3/4" thick. With simple push-button controls, a hand-held pendant for directional control, and a laser-light guide on the bridge, the SIERRA® is easy to set up and operate. You simply won't find a more reliable, higher performance, diamond gantry bridge saw.

## FASTBACK® II Edge Polisher

The FASTBACK® II will edge, polish and chamfer backsplash as well as countertops upto 65 IPM (dependent upon material and piece size) in just ONE SINGLE PASS. Support large material pieces with the optional SlabBACK™ material support system. This system will provide you the capability of running upto 96 inch pieces through the highly productive FASTBACK® II Edge Polisher.

## PRO-EDGE® IV DECORATIVE EDGER

The PRO-EDGE® IV Automatic Edge Shaper and Polisher, creates quality edges on granite, marble, and quartz from end-to-end unlike any other machine on the market. Produce up to 12 feet per hour. The PRO-EDGE® is a fine-tuned combination of electronics and hydraulics that shapes and polishes a variety of flat, convex, concave, and ogee edges. The PRO-EDGE® stores up to 70 programmable, repeatable edge profiles allowing machine setups to be made quickly and easily.

## VELOCITY® DECORATIVE EDGER

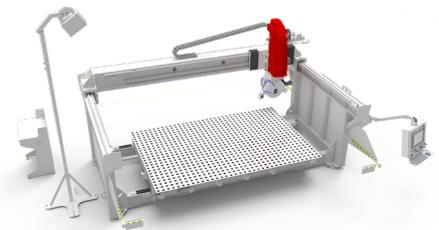

The VELOCITY® provides complete control for finishing high-quality edges on pieces up to 12 feet long in a single pass. Smartspindle technology and tool-stagger programming polishes top and bottom edges – saving you material handling, manual labor, and time. Process hundreds of feet per day with a VELOCITY® and one operator.

## SIDE-SHOT Pathfinder™

The all new SIDE-SHOT™ provides fabricators the tools to capture slab images right at the machine with an extremely small footprint requirement. The SIDE-SHOT™ incorporates SlabSmith™ Lite software for vein matching and 3D rendering capabilities.

This unique system can be used in conjunction with the OPTIMUS™ Robotic SawJet, SABERjet™ XP CNC SawJet, FUSION CNC SawJet, VOYAGER™ XP CNC Saw, and the TITAN® Fab Center.

## SLABSMITH™ / PATHFINDER®

Slabsmith™ redefines the possibilities and potentials when working with both natural and quartz stone products. Beginning with proprietary calibration techniques, Slabsmith™ produces highly accurate digital slabs from physical slabs. The digital slabs are true to life in both color and dimension and contain all relevant properties of the original slab. Slabsmith™ uses these digital slabs to provide benefits and advantages that include inventory management, 3D visual layout, sales and marketing tools, streamlined manufacturing, and targeted business decisions.

## HYDROCLEAR™ PRO WATER CLARIFICATION SYSTEMS

The HydroClear™ Pro systems represent a new generation of water recycling. This all-in-one system eliminates the need for a separate holding tank saving you precious floor space. In addition, the HydroClear™ Pro systems can be equipped to automatically monitor and manage the chemical systems, saving you significant time. The unique design of the HydroClear Pro™ allows the slurry to rapidly settle and can accommodate up to 170 gallons per minute to our shop.

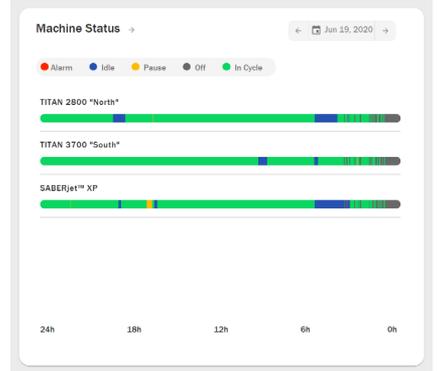

Models: Available in 6 unique model configurations.

## PARK IQ™ BUSINESS INTELLIGENCE SOFTWARE

Keep your machines running, anytime, anywhere with the latest innovation in software, Park IQ™. Park IQ™ is the tool to:

- Retrieve, analyze, transform, and report your shop's performance real-time
- Connect your machine's production data into a sign reporting platform
- Make data-driven decisions regarding your operations with detailed shop metrics
- Identify bottlenecks and efficiency opportunities that will improve your bottom-line profitability
- Understand your shop's performance, 24/7

# FABRICATOR SPOTLIGHT

## Customers of Park Industries®

### CHIVINO SURFACES

“When I am cutting 30 slabs a day, I cannot afford for my machines to be down... What separates Park Industries® from the rest, is they make sure my machinery will not stay down.”

### GRANITE PERFECTION

“When we partnered with Park Industries®, we easily doubled the amount of money we made in a year. We are able to work way faster with increased precision and no mistakes!”

### STONE STUDIO BY CCI TESTIMONIAL

“Park's performance is unmatched...the reliability is unmatched...and the customer service is unmatched. We will never switch from Park. Period. Plus they are just beautiful machines.”

### NATURAL STONE DESIGN

“Our experience with Park Industries® machinery has been a night and day difference above the other equipment companies. The combination of the SABER™ CNC Saw and the TITAN® Router has become a production powerhouse.”

# LEGENDARY SUPPORT

Everything We Do Is About Delivering Customer Value

## THE PARKWAY

### Systems of Values

Park believes your financial investment in equipment is a big decision. We believe that in order to be confident in your purchase, you need to experience Trust, Integrity, and Respect in the equipment manufacturer. These elements are the essence of the ParkWAY, and are the values Park associates strive to live by each day.

Based on this solid foundation of values, Park has built a reputation for integrity in the industry, which has made Park Industries® the largest manufacturer of stoneworking equipment in North America. Simply put, customers trust Park to help them succeed.

## RELIABILITY

### World-Class Customer Service

What makes Park Industries® the first choice for so many fabricators? Park manufactures high-performance equipment, but there's something more: our long-term devotion to our customers' machine uptime and ultimate success.

Beyond impressive dependability and durability, your machine comes with a whole company of experts. Our superior customer support team is available to answer your questions, 24 hours a day, 7 days a week.

Are we obsessive about customer service? Absolutely! But it's the only way we know to deliver Precision. Performance. and Peace of Mind.®

## PARTNERSHIP

### Providing You More Savings Strategies

We know that your equipment plays an integral part in your profitability. Our focus is to help you identify your "pains" within your facility. We are laser focused on identifying opportunities to reduce your labor costs, increase your shop efficiency, and increase your material yield. It's all about eliminating your company's pain points and making you more profitable.
